

MAKING

PEGASUS

*The Beautiful Adventure of Life*

GREGORY W. DAVIS

Who am I?

Where did I come from?

Why am I here?

Where is here?

What shall I do?

Is there anything I shouldn't do?

Where am I going?

When am I?

Is time real and how does it work?

Why this and not something else?

Is there a grand purpose to it all?

What is beauty?

Is ignorance bliss?

Why is the search for happiness innate?

Is lasting happiness possible or even desirable?

Is knowledge power?

Where do our thoughts come from?

What is consciousness?

# Existential Examination and Exploration

Everyone eventually experiences existential examination and exploration.

The answers to these foundational questions seem critical but are the answers even discoverable? Comprehensive consideration of these questions might fill volumes. Sincere attempts at answering these questions are what give rise to religions governments.

They impact every aspect of your life. The egoic and exploitive have spun answers to their 'advantage' forever. Accepting the adventurous challenge of figuring out these answers for your self is the essence of personal fulfillment.

So what is the truth? Is there a process or intellectual structure that can simultaneously array all truths in our consciousness as we become aware of them allowing them to be visibly of assistance as we address each new arising challenge?

Philosophy is literally the 'love of wisdom'. Wisdom is what actually works or Knowledge rightly applied. Making Pegasus is deeply philosophical.

## A Horse for Humanity and Poseidon's Gift

The framework for answering the questions above is the primary purpose for the 'Making Pegasus' project. This ultimate breeding and training project seeks to answer these questions by fulfilling the platform created by the God Poseidon when he struck his trident into the ocean from whence sprang the horse as his gift of assistance to the evolution of humanity.

Poseidon's gift has been the greatest assistance to humanity's evolution of anything there has ever been and it still assists humanity today. Were it not for the horse, humanity would not be where we are in our evolution now. The horse has been Mankind's food, force multiplier, transportation, carried him into battle, has been his entertainment, inspiration and friend.

The attempt to create the greatest horse in the world drawing the curious eye and ear of humanity suggesting answers to those questions is no small ambition.

The Making Pegasus project crossbreeds 13 breeds in its quest to create the greatest horse in the world. The creation of the greatest horse in the world actually becomes a grand metaphor for the deliberate creation of the ultimate life.

The objective is a horse of jaw dropping size, elite athleticism in terms of strength, speed, endurance, agility and grace, with all the elements of equine beauty including heavy feather, mane, tail, noble head and neck, unique coat and eye colors, intelligence, temperament and genetic depth and breadth. Only when patterns are broken can new worlds emerge.

At a time when the world is utterly confused, lost in the issues, and divided, a return to an understanding of fundamental and foundational principles can solve every issue and challenge humanity faces.

The Making Pegasus breeding project continues the use of Poseidon's horse platform from which it teaches the **3 most important concepts in all of consciousness**. These simple, eloquent and foundational concepts, when understood and respected, allow humanity to evolve at its highest potential rate.

## The Three Concepts of Consciousness

### Infinite Experience

The 1st principle arises out of the exhortation emblazoned above the portals of Apollo's Temple at Delphi: *Temet Nosce* (Know Thyself). Of all the bodies of knowledge the ancients could have directed us to, why self-knowledge?

In Hamlet, Shakespeare wrote, *"Neither a borrower nor a lender be; for loan oft loses both itself and friend; and borrowing dulls the edge of husbandry. This above all, to thine own self be true, and it must follow as the night the day Thou canst not then be false to any man."*

This noble precept is often cited by Plato: *"Do thine own work, and know thyself."* Each of these two parts generally covers the whole duty of man, and each includes the other. **He who will do his own work well, discovers his first lesson is to know himself. The greatest thing in the world is for a man to know himself.**

Paramahansa Yogananda wrote: "Millions of people never analyze themselves. Mentally they are mechanical products of the factory of their environment, preoccupied with breakfast, lunch, and dinner, working and sleeping, and going here and there to be entertained. They don't know what or why they are seeking, nor why they never realize complete happiness and lasting satisfaction. By evading self-analysis, people go on being robots, conditioned by their environment. True self-analysis is the greatest art of progress."

When the effort to know who you really are becomes a passion then all your activity becomes a mirror.

So, who are you? What, when, where, why and how are you? Whatever else you may be, you, like everything in the Universe, are Energy. We used to speak of energy and matter but matter is simply an energy field. The 1st law of Thermodynamics teaches that energy cannot be created or destroyed, only changed. It is from this fact, that your eternal nature is intimated.

Energy has a wave and particle form and energy is three dimensional, not two dimensional as implied by an oscilloscope. Energy is modulated in numerous ways to manifest infinite everything. Wavelength, Amplitude, Frequency, Intensity, etc. are some of the properties of energy that can be modulated in nearly infinite ways to form infinite manifestations.

Feeling is the highest level of reason. It is conscious awareness of energy as it is modulated by the information embedded in it.

Energy and information make up a horseshoe but you are different than a horseshoe. What is that difference? Consciousness. It is the only bona fide mystery in the Universe. Despite centuries of contemplation and deliberate study, no one really knows what consciousness is. What we do know is that self-consciousness begins when the skill is developed to differentiate ones-self from one's environment and it is fulfilled when one comprehends the Universe.

So, if you are energy, information and consciousness, the only possible meaning of existence is “Infinite Experience”. That’s it. That’s the 1st most important concept in all of consciousness. In other words, what do you do for a hundred years, a thousand years, a million years, 15 septillion years in an infinite eternal Universe? You go to any dimension of reality that interests you and collect an experience. The only possible activity in any dimension of reality is the creation of beauty and skill demonstrates an awareness of that truth. What else is there to do?

You will also discover that experiences are infinitely nuanced with a metaphoric dial, which can be turned only one way or another in immeasurable degrees of Allowance or Direction. The calculus in an infinite eternal Universe is that there is no tragedy as contrast is the mother of clarity. Without a point of contrast ‘tragedy’ or an awareness of its possibility that informs success and joy, success and joy could otherwise never be known.

## Liberty

If Infinite Experience is the only possible meaning of existence then the 2nd most important concept in all of consciousness, the undergirding, over-arching ultimate truth of the Universe and core of love is, Liberty.

Liberty is the right to create your experience as you wish subject only to the equal rights of others. Comprehension of, and respect for the Liberty of others is the only gracious modality of co-existence.

If love is coerced, it is no longer love. Love is the voluntary conveyance of energy for the evolutionary benefit of the object of your love and Liberty lies at its core. Love cannot exist outside of the context of Liberty.

Pursuing your self-interest is virtuous until the boundary of another's Liberty is crossed in its pursuit.

That boundary is the precise point at which self-interest becomes greed.

Ironically, in a nation founded upon Liberty, the concept is not even taught in government schools anymore.

Its understanding has atrophied to near oblivion. This is why we are lost, failing, and divided right now.

## Self Ownership

Ownership is defined as exclusive control. If you do not enjoy exclusive control, you do not own it. Under the feature of Self-Ownership, you own your body, thoughts/ideas, words, whatever you create and no one is entitled to any of it unless you voluntarily convey it to them. Likewise, you are not entitled to those things of anyone else.

## Self-Reliance

If you own your own self, you are responsible for the care of yourself. Nobody is responsible to take care of you and you are not responsible to take care of anyone else, unless you create children and then your job is to help them become independent of you and your co-creator as fast as possible. You may, of course voluntarily give and receive assistance as long as there is no coercion.

## Private Property Ownership

Self-Reliance requires private property ownership to make your food, shelter, clothing, the energy you need and products that allow you to pursue your happiness. Again, Ownership is described as exclusive control and right now in the United States, you have exclusive control, over nothing.

## The Right of Association

Free people have a right to associate or not associate with whomever they choose. This might seem obvious but if the “social contract” was a real contract and the government came to you and invited you to join their government, as they should, you might responsibly inquire, “Ok, what are you offering me?”

To which the government might respond, “oh we have a wonderful program, lots of services for you. We are going to bring a sewer line to your home, make sure there is only one power line on your street to your house, create dams to control flooding and generate electricity, build and maintain streets, ports, educate your kids, create a police force to protect you and your property, establish a court system so you can settle your differences civilly instead of using guns in the street, create a military industrial complex to protect us from foreign invasion, create a post office and Amtrak and many other things.”

To which, one might responsibly and reasonably inquire, “Sounds interesting, exactly how much is this going to cost me?” To which, if the government salesman answered honestly, would say, “It’s a great deal, it will only cost 88% of everything you produce in your lifetime.”

To which a Free Man might respond, “Thanks for the offer but I pass on that opportunity.” Or a Free Man enjoying his right of association might buy the services he desires and leave others he does not wish to buy. But, there is no social contract today. Your inalienable rights as a Free Man are no longer a consideration, let alone honored, and you are herded like innocent naïve sheep from birth by a parasitic system. Your Right of Association is not even acknowledged anymore.

In the 15,000 hour indoctrination program now called ‘K-12 Public Education’ there is one primary objective and that is to teach submission to authority. It is not to teach reading writing and arithmetic. This may explain why the United States, despite spending more per student than any other nation in the world on education ranks 13th in reading, 17th in Science and 34th in mathematics. We are not getting our money’s worth! As an intellectual power the United States is really not competitive in the world anymore, which is a huge strategic miscalculation.

Our Nation's founding document, "*The Declaration of Independence*" spells out the purpose of government and your Right of Association with it.

*"We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable Rights, that among these are Life, Liberty and the pursuit of Happiness.— That to secure these rights, Governments are instituted among Men...."*

So your Life, Liberty and right to pursue happiness as you wish precede the establishment of any government. Indeed, the whole purpose of government is to protect your right to life, Liberty and YOUR Pursuit of Happiness. But it no longer does any of what it was founded to do and actually hijacks it outright.

*Our founding document continues:*

*"...deriving their just powers from the consent of the governed."*

When did any of us ever "consent" to the unreadable volume of rules, laws, statutes, ordinances, codes and regulations now requiring your obedience? The answer for most is never. We never consented. So, without consent, what powers does government have over us? The answer is "un-just powers" which is also known as tyranny. The "social contract" presumed in your compliance is actually legally invalid because it lacks Informed Consent or the "meeting of the minds".

## Informed Consent

There can be no consent without the capacity to be fully informed of the rights, benefits, obligations and consequences of an association. Without informed consent there can be no moral association. Forced association is slavery. When the production of your labor is taken by force or the threat of its use for the benefit of another, that is slavery.

## The Non-Aggression Principle

No one has a right to initiate force against anyone else and any interaction that is not voluntary is inherently illegitimate.

## Anonymity

It is your right to live completely anonymously without any symbols or codes of identity, description or location of any kind.

## Privacy

If one does adopt symbols or codes of identity, description and location he is entitled to their privacy. Privacy is controlled disclosure of any and all activities in one's life. Any effort to penetrate the privacy of another is inherently illegitimate and tyrannical.

It is ironic that none of the key features of Liberty operate in the United States of America at the present time as it was founded upon and succeeded wildly for decades precisely because of this ultimate truth. The ignorance of this ultimate principle, Liberty, determines our collective rate of evolution.

# Twin Souls

The 3rd most important concept in all of consciousness is felt by nearly everyone. It embodies the fundamental Nature of Mankind. It is referenced endlessly in literature including Plato's "Symposium" and is a sanctified truth in the esoteric expression of nearly all religions. This foundational principle is what gives rise to music, dance, art, is the inspiration of the creation of beauty and even discipline itself. Plato intimated its power when he wrote, "At the touch of love everyone becomes a poet".

The concept is that we were created androgynously with Masculine and Feminine polarities (positive and negative poles) and evolved for eons together until we developed the skill to comprehend the existence and value of duality and finally realized, "you know, my love, if we divided and conquered we could evolve faster. You go acquire those bodies of knowledge for us and I will acquire these other bodies of knowledge for us and we will follow our unique frequency back to each other, exchange what we've learned and advance faster."

The idea is that our energetic essence was split into separate masculine and feminine polarities, enabling bodily reproduction, and the pursuit of evolution with perceptions (observation and interpretation) enhanced by those polarities.

This doctrine feels like a Soul Mate and has become known as Twin Souls. Symbols of Twin Souls are everywhere and include 'The Star of David', the Yin Yang symbol, the symbol of infinity (sideways 8). Mathematically it is the beginning of the Fibonacci sequence and often associated with base ten numbers such as 11 and 1111, geometrically in the rectilinear and curvilinear. While eternally evolving Twin Souls are perfect complements.

The principle permeates the Universe and is manifested in the microcosm to the macrocosm. From twin subatomic particles (whose counterparts are connected and spin when the other spins in the opposite direction) to stars (nearly all of which are binary) even to Galaxies, the dual nature of Twin Souls is everywhere.

Rumi intimated the symbolism of the Yin Yang symbol when he wrote, "Lovers don't finally meet somewhere. They're in each other all along." Plato writes, "Love is simply the name for the desire and pursuit of the whole." It is the quest for 'Holiness', reunification.

So how do you find your other half? Well that brings us back to the valuable key exhortation emblazoned above the portals to Apollo's temple at Delphi; "Know Thyself". Only when you understand who you are, can you recognize your other half when you encounter them. Why? Because they will be like you.

When, through deliberate intuitive analysis of your experiences, you come to know yourself and do the things you truly love, and are uncompromisingly obedient to the "voice within" you will be guided to your other half who will be doing the same things.

When Twin Souls call to each other the Universe hears the whisper and conspires to bring them together. In the world of spirit, there are no insurmountable obstacles... distance is not an issue, time is not a barrier and existing relationships quickly run their course. Twin Souls who long for reunification and hold on to the hand of the divine will see heaven and earth move to make a way for their reunification. It is why everything exists in the first place.

The process of reunification is usually not easy. When a true heart sets out in search of its fulfillment, in search of its one true love, that heart will know the suffering inherent in that noblest of quests fulfilled only by surrendering to the one true compass where every second of that search becomes guided by a constant encounter with God and with Eternity.

There is no greater joy than finding one's other half in various dimensions of reality and then to rest together in the true joy of exchange and further enlightened co-creation.

Relationships become opportunities for growth and loving evolutionary assistance of each other and when they have run their course and fulfilled their purpose the other is graciously released. If this concept of Twin Souls were comprehended and respected, messy divorces and all their wasted time, trauma and energy are eliminated.

## A Brighter Future with Making Pegasus

Why are these 3 concepts so important? Because if they are fully comprehended and respected, no one needs a lock anymore; Police become irrelevant and we don't need their cars, uniforms, belts with gadgets, fuel, tire changes, etc.; the courts, judges, bailiffs, clerks and prisons, and guards become unnecessary; most of government goes away; the military intelligence complex becomes irrelevant; lawyers become unnecessary; divorces and broken homes no longer exist, and we can redeploy all the resources we waste in these parasitic activities to science, technology, engineering, mathematics, medicine and the arts. We would flourish in every conceivable way and be able to soar amongst the stars with each other instead of mucking around in the mud. The Universe is a big place and there is wealth of experience for all.

Why is it important for us to flourish? Because our star, the Sun, Sol, fuses 600 million tons of hydrogen into 596 million tons of helium every second. The lost mass of 4 million tons every second emanates out in all directions as heat and light energy. The constantly reduced mass of the Sun can no longer hold its surface in place and so is continually expanding. Our Sun has one destiny and one destiny only and that is to grow from the yellow dwarf star it is to a red giant star following the main sequence stars on the Hertzsprung Russel diagram. Our Sun's surface will eventually grow out to Mercury and fry and absorb it, then Venus, then the Earth and Mars and eventually reach out to Jupiter.

Our planet, our home, has one destiny only as well and that is to be fried by our Sun. Now, this is not going to happen for some time but the science, technology, engineering and mathematics also does not just happen overnight either. We need to figure out how to get off this planet and then figure out where to go or how to move the planet.

So we are well advised to quit wasting our time. We need to stop looking between our legs and wondering what gender we are. We need to stop the ridiculous power and money games hidden behind race, gender, and politics (which is the process of legalizing the usurpation of another sovereign being's Liberty). We need well-earned degrees in hard sciences, physics, chemistry, biology, engineering, and mathematics.

In an infinite eternal Universe there is much to experience. All experience arises from the perception (observation and interpretation) of contrast. Tragedy and Joy and all possibilities of non-dual consciousness in an eternal continuum are what existence is about. When we understand and respect the 3 most important concepts in all of consciousness 1-the Meaning of Existence: Infinite Experience, 2-The Ultimate Truth of the Universe: Liberty, and 3-The nature of Mankind: Twin Souls, life is truly a beautiful adventure.
